

DEC Compliance made easy

Achieve compliance and reduce costs with Elemental

What is a DEC?

A DEC reflects a building's energy performance based on actual metered data. Rated A-G (A = Most Efficient), a valid DEC and Recommendation Report are mandatory for public buildings:

- Over 250m² with frequent public access (annual DEC)
- Over 1,000m² (annual DEC & 7-yearly Recommendation Report)
- Between 250m² & 999m² (DEC & Recommendation Report every 10 years)

Understanding your DEC

Your DEC provides valuable insights into your building's energy performance:

- Operational Rating: This compares your building's efficiency to similar ones.
- Benchmarking: This section highlights how your energy use compares to industry standards.
- Previous Performance: Track your energy efficiency improvements over time.
- Carbon Emissions: See the CO₂ produced by your building's energy consumption.
