

# ESOS Compliance made easy

Empowering businesses for a sustainable future: Elemental Consulting Group and ESOS Compliance

## What is ESOS?

The Energy Savings Opportunity Scheme (ESOS) is a mandatory energy assessment scheme enforced by the Environment Agency in the UK. Qualifying organisations must report on their energy consumption every four years

## Why comply with ESOS?

- **Avoid penalties:** Failing to comply or submitting false information can result in significant fines.
- **Protect your reputation:** Non-compliance can lead to public naming by the Environment Agency, potentially damaging your organisation's image.
- **Unlock cost savings:** ESOS helps identify areas for improved energy efficiency, leading to significant reductions in your energy spend.

## What do we do?

### Meet compliance deadlines

We guide you through every step of the ESOS process with full support. We ensure all documentation is prepared and submitted before any deadlines - for peace of mind.

### Data collection and reporting

Our team meticulously gathers and compiles your energy consumption data, ensuring all necessary information is readily available for accurate reporting.

### Energy efficiency improvements

Using thorough ESOS audits we deliver fully customised recommendations that guarantee compliance and unlock significant - and fully costed - savings via improved efficiency for your business.
